

To His Excellency António Guterres and Other Esteemed WHO and UN Officials:

I am writing to ask that you urge government officials worldwide to immediately call a halt to 5G until costs to health, wildlife and the Earth are assessed.

5G infrastructure will vastly increase public exposure to wireless radiation and significantly decrease privacy and security. Of concern as well is the mega increase in energy consumption, effects on wildlife - particularly on pollinators, resource extraction and the resultant streams of e-waste, all of which would contribute to environmental damage.

Tens of thousands of scientific papers (linked herein) have cited apparent connections to the role of electromagnetic radiation in a multitude of adverse health effects, including depression, infertility, cancer, damage to DNA/gene expression, oxidative stress, pregnancy complications, melatonin production, neurological disorders, immune dysfunction, Alzheimer's/dementia, Leukemia, etc.

Over 1,600 scientific papers can be found here: <https://www.powerwatch.org.uk/science/studies.asp>

Another 4000+ studies can be found here: <http://www.bioinitiative.org>

And another 23,840 studies also linked here: [www.EMF-portal.org](http://www.EMF-portal.org)

To roll out 5G without safety testing would directly breach the Precautionary Principle as well as the Human Right to Informed Consent, enshrined in UN Law. Implementation must halt until more independent research has been conducted to prove this technology is safe for humans and wildlife. Such research must also be accompanied by thorough and comprehensive Public Consultations. Anything else would put lives at risk, be a severe breach of Human Rights, and would amount to assault on the Electromagnetically Sensitive (EMS) who would have nowhere to escape to and would become refugees in their own countries.

In conclusion, it would be highly irresponsible to roll out an untested technology which could have disastrous effects for humans and the Environment. In fact, to roll out 5G without Informed Consent or Due Diligence, and with no legitimate liability coverage, would constitute Technological Trespass and be a Crime against Humanity and all life.

I urge you to do everything you can to protect people and the Environment from this onslaught according to your Duty of Care -- your first and foremost responsibility as public servants.

I look forward to your reply and urgent action.

Many thanks in advance,

Yours Most Sincerely,
